

Roger Morera

AI-first Full Stack Developer

 dev.morera@gmail.com  Barcelona, Spain

About Me

AI-first Full Stack Developer with hands-on experience in **React, TypeScript, Node.js and modern architectures**. Focused on **AI-powered engineering workflows**, using **Claude, OpenAI models through OpenCode** and agentic development practices to move faster while keeping strong attention to architecture, code quality and technical decisions.

I work best in product-driven teams that value autonomy, pragmatic engineering and open discussion. I enjoy challenging ideas, learning from people across different areas and bringing an entrepreneurial mindset to build useful, scalable software.

Experience

AI Kosmo	Italy (Remote)
Full Stack Developer	March 2026 – Present
- Lead full-stack development of the main Cloud dashboard (Next.js) used by 500+ hotels and their teams, plus internal staff with elevated access. - Ship features end-to-end from backend (Bun + Hono) to frontend, translating requirements from the international operations team into UI/UX, new features and bug fixes. - Develop the corporate website from scratch with Next.js and Payload CMS, delivering pixel-perfect Figma designs and giving the team full content autonomy. - Own security, access control and role-based permissions across the platform, ensuring proper data isolation between hotels and internal staff. - Implement event tracking with PostHog and an internal analytics dashboard for product and operations visibility. - Use Claude, OpenAI models through OpenCode and agentic workflows to ship faster while maintaining strong code quality across the stack.	

Fantasticfy	Barcelona
Full Stack Developer	April 2025 – March 2026
- Led the adoption of AI tools (Claude, Cursor) training a team of 5, improving efficiency by 60%+ and enabling us to handle more clients with higher technical quality. - Developed Shopify applications end-to-end (frontend and backend): from concept to deployment with CI/CD on Azure and Docker. - Implemented Hexagonal Architecture and DDD (domain-driven modules), enabling better team collaboration and improving scalability. - Acted as the main contact point with clients, translating business requirements into technical solutions. - Built custom components with Liquid, Polaris and React for unique merchant experiences.	

Credible	Barcelona (Remote)
Co-founder & Full Stack Developer	December 2024 – January 2026
- Co-founded a SaaS startup with an international team, contributing to product strategy, technical direction and full-stack development in a remote, agile and fast-paced environment. - Designed and implemented frontend architecture with React, TypeScript and Clean Architecture, prioritizing scalability and maintainability. - Collaborated with Python backend to integrate AI models and ensure a seamless user experience. - Selected by EWOR, a top-tier European accelerator for high-potential founders.	

IMPAKTER	London (Remote)
Full Stack Developer	September 2024 – April 2025
- Led the full development of a sustainability platform with data from 3,000+ companies, using Next.js and TypeScript. - Designed a comparison engine for ESG metrics analysis across companies. - Automated data migration and managed the flow of information with the analyst team. Pixel-perfect implementation of Figma designs with accessibility best practices.	

Education

UNIR - Universidad Internacional de La Rioja	Master's Degree
Full Stack Development	September 2024 – July 2025
Frontend with Angular 19 and TypeScript. Backend with Node.js and Express. Databases: MySQL and MongoDB. Version control with Git and testing.	

Self-taught Learning	August 2022 – Present
Full Stack Developer	
- Personal learning method developed after two university degrees and a master's, combining self-discipline, mentorship and consistent practice. - An approach that allows me to quickly acquire new technologies while staying aligned with industry best practices.	

Skills

Frontend	Backend	DevOps	Databases	AI & Agents
React, Next.js, TypeScript, JavaScript, TailwindCSS, CSS, HTML, Liquid, Polaris, Payload CMS	Node.js, Express, Python, REST APIs, GraphQL, OOP, Hexagonal Architecture, Clean Architecture, DDD, Design Patterns, SOLID Principles, Bun, Hono	Docker, CI/CD (Shopify, Azure), Git, Testing, Agile/Scrum, PostHog	PostgreSQL, MongoDB, MySQL, SQLite, Supabase	Claude, OpenAI, OpenCode, ChatGPT, Cursor IDE, GitHub Copilot, AI Agents, Agentic Workflows, MCP, Custom Skills, Prompt Engineering, Context Management

Languages

Spanish	Catalan	English
Native	Native	Advanced

Other Education & Certifications

React, Hooks, Context, Redux, MERN	April 2024
Udemy	
Google Cybersecurity Professional Certificate	January 2024
Coursera	
Modern React with Redux	September 2023
Udemy	
Bachelor's Degree in Physiotherapy	September 2017 - June 2022
Pompeu Fabra University	
Bachelor's Degree in Sports Science	September 2017 - June 2022
Pompeu Fabra University
