Summary

Hi there, I'm Pavel Zavadski (Pavlusha) 🙋.

I'm experienced backend developer with strong expertise in API design and deployment automation through AWS and Docker. Specializing in PHP (Laravel and Symfony) and NodeJS (Or Bun as alternative runtime), I can build applications from scratch and efficiently push them to production. 💻 Also I love optimizing application resources and focusing on cost efficiency.

Projects

Dot Calendar May 2024

Dot live calendar that displays the weeks you have lived as if you lived 100 years. It helps to pay attention to the transience of life, which allows you to make more global plans, because 1 point - 1 week

Stack: Bun, HTML, Typescript, TailwindCSS

<https://dotcalendar.site/>

Paketomir Jan 2025 – Mar 2025

NextJS implementation

SEO improvment

Stack: NodeJS, NextJS, TailwindCSS

<https://paketomir.by/>

Print Workflow App

An application for a printing house that allows customers to design and customize products.

Stack: PHP 8, Symfony 7, Elasticsearch, TurboJS, SymfonyUX, ApiPlatform

Alert System Aug 2024

A real-time alert system that notifies users of nearby incidents and potential hazards

Stack: NodeJS, Javascript, NestJS, AWS, Git, Docker, PostgreSQL

Music Bands Managment Oct 2023

A platform for booking live music. Venues can find artists, artists can promote themselves, and fans can discover local events.

Stack: NodeJS, JavaScript, Git, AWS SQS/S3/EC2, microservices, NestJS, Express, Stripe, Git, Docker, PostgeSQL

Resource Management System Sep 2023

Web application for device and employee managment

Stack: JavaScript, HTML, CSS, NodeJS, Express, Git, Docker, PostgreSQL

Npleto.ru Jun 2023 – Present

I developed a website for a music band using NextJS technology. I optimized the website for search results to ensure it would appear in the top search results, and also adapted the website for AI reading.

Stack: NodeJS, NextJS, React, pnpm, Typescript, Eslint

<https://npleto.ru/>

Pavlusha.me

May 2023 – Present

My own website

Stack: NodeJS, NuxtJS, VueJS, TailwindCSS, Vite

<https://pavlusha.me/>

PHP Patterns

May 2023

Stack: PHP, PHP 8, Composer

<https://github.com/Pavlusha311245/PatternsPHP>

Nginx Unit PHP SDK

Jul 2023 – Oct 2025

Stack: PHP

<https://github.com/Pavlusha311245/nginx-unit-php-sdk>

Business Finder Germany

A platform for discovering and rating businesses in Germany. Users can search by category, leave feedback, and use map features to find locations, helping others make informed decisions.

Stack: PHP, Laravel, MySQL, Laravel-blade templates

Science Project

A web platform that aggregates large volumes of scientific data, articles, and studies in medical and pharmaceutical domains. Built from scratch, it includes third-party integrations, advanced search with filters, and user notifications for new relevant content.

Stack: PHP 8, Laravel, Intertia.js, VueJS, MySQL

Machinery

A dashboard for monitoring and managing construction machinery, tracking performance, location, and maintenance to optimize operations.

Stack: NodeJS, Express, AWS Lambda, AWS Lambda Step Functions, React

System W

The specific purpose of the application is to keep track of the different projects of wood material that is passing through the process of the factory from arrival to delivery.

Stack: PHP 7.4, Laravel, MySQL, Docker

Cars

The project proposes a database where users can register their cars with basic attributes (make, model, year, etc.). The goal is to create a car identification system to support use cases such as resale, service, insurance, and safety.

Stack: PHP, Laravel, MySQL, Stripe, Firebase messages, Docker

Healthcare Project

This is a communication portal for clients and therapists. Users can arrange online meetings via video call and also share documents, guides, or personalized instructions during or after the video call.

Stack: PHP 8, Laravel, PostgreSQL, Docker, Agora, Stripe

Venori

Mar 2021 – May 2021

Applications for booking tables in a restaurant. It allows you to find a restaurant nearby, as well as to make a reservation for a selected date, including the number of people and the time of travel.

Stack: PHP 8, Laravel, Laravel-blade templates, MySQL, Docker

<https://github.com/Pavlusha311245/VenoriBackend>

Как рассказать о сайте поисковой системе 2

17 April 2025

Pavel Zavadski

Доброго времени суток. В этой статье я хочу дополнить первую часть рассказа о том как же донести поисковику информацию о своём сайте. Здесь будут рассмотрены такие темы как IndexNow, security.txt, schema.org.

<https://habr.com/ru/articles/901490/>

Как рассказать о сайте поисковой системе

14 September 2023

Pavel Zavadski

Сайт написан, домен куплен, так почему же я до сих пор не вижу его в Google/Yandex?

В этой статье Вы узнаете как поисковые системы определяют ваш сайт и как же его добавить в поиск.

In simple terms about a simple Nginx Unit

8 August 2023

Pavel Zavadski

This article describes the new Nginx Unit web server. In it you can learn more about the web server itself, its installation and configuration: how to use listeners, routing, how to install TLS certificates. The article will show how easy it is to work with it and that huge configs are slowly becoming a thing of the past.
